Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 July 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

An amendment dated 7/30/07 has been considered with the following results:

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Jeong (US 6,829,202)

See the rejection applied thereto in the last Office action dated 04/30/07, and further see Fig. 2 that shows the focusing coil (12) is wound around the lens holder (10) in plane perpendicular to the focusing direction, and see Fig. 2 that also a pair of fixed magnets (53) arranged in a direction perpendicular to the focusing and tracking directions. It is noted that no directions are labeled in Fig. 2, but one of ordinary skill in the art would immediately recognize that the focusing direction is a vertical direction relative to a recording surface of the disc and the tracking direction is a radial direction relative to the disc as described in Fig. 2 below. It is also noted that the tracking direction of the actuator must be in a direction as described in the Fig. 2 below due to the structure arrangement of the magnets 53, tracking coils 13 and suspension wires 30.

Fig. 2***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2627

4. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jeong (US 6,829,202) in view of Suzauki (JP 63-259842) cited by Applicant.

See the rejection applied thereto in the Office action mailed 4/30/07.

Response to Arguments

5. In response to Applicant's arguments filed 7/30/07, Applicant should note that based on the arrangement of the magnets 53, tracking coils 13 and suspension wires 30 of the actuator shown in Fig. 2 of Jeong, it is technically impossible for the actuator to be moved in a direction along the magnets 53 as the tracking direction as described by Applicant in attached Fig. 2 due to the magnet flux from the magnets 53 supplied to the tracking coils 13 and the movement of the suspension wire 30. Jeong, according to column 5, lines 63-67, stated that the focusing and tracking operations of the actuator shown in Fig. 2 remain the same as those conventional optical pick-up actuator used in general CD player, and examiner believes that there is no such conventional optical pick-up actuator having the same structure arrangement as shown in Fig. 2 of Jeong capable of moving in the direction along the magnets 53 as the tracking direction as described by Applicant in attached Fig. 2. Accordingly, Jeong, according to Figs. 1-7, as applied to reject claims 1-4, and in combination with Suzuki as applied to reject claims 5 and 6, do show all the features of the instant claimed invention.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2627

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
